# Management Discussion and Analysis

## BUSINESS REVIEW

For the six months ended 30 September 2015 (the “Period”), the Group recorded a total turnover of approximately HK\$10,538,000 (for the six months ended 30 September 2014: approximately HK\$69,100,000), representing a decrease of approximately 84.7% as compared with the same period last year. Gross profit was approximately HK\$738,000 (for the six months ended 30 September 2014: approximately HK\$7,476,000), representing a decrease of approximately 90.1% as compared with the same period last year. During the Period, loss attributable to the owners of the Company further widened to approximately HK\$46,021,000 (for the six months ended 30 September 2014: loss of approximately HK\$35,388,000). The increase of loss for the Period is attributable to (i) the decrease in the Group’s revenue of approximately 84.7% for the six-month period ended 30 September 2015 as compared to that of the corresponding period in 2014; and (ii) the increase in selling expenses as a result of promotion for the retailing business. Loss per share was HK\$0.019 (for the six months ended 30 September 2014: loss of HK\$0.057 (Restated)).

## RETAIL BUSINESS

During the Period, the Group’s retailing business was affected by the weakened consumer sentiment caused by economic uncertainties in Mainland China and strategic closures of the Group’s retail shops in order to reduce its rental burdens. As at 30 September 2015, the Group had two retailing points (As at 30 September 2014, 11 retailing points) throughout the PRC. During the Period, the retail business recorded a turnover of approximately HK\$580,000 (for the six months ended 30 September 2014: approximately HK\$5,406,000), accounting for approximately 5.5% (2014: 7.8%) of the Group’s total turnover and representing a decrease of approximately 29.5% (2014: 72.9%) as compared with the same period last year.

Based on the past experiences, the unsatisfactory performance in retailing business was mainly resulted from shops with high rental costs in first-class shopping malls in PRC. Further, the management expects the rental of the shops in PRC will decrease due to recent uncertainties of economies in PRC. Hence, it is believed that the Group can enjoy the lower rent when opening new shops later.

Notwithstanding our reduced scale of retailing operation, the management considers the promotion is necessary. It is believed that maintenance of brand awareness depends on the continuous promotion. Once promotion suspends, we may lose the awareness on our brands from customers. In effort to continue to build up our brand, we had to continue our brand promotion during the period.

As at 30 September 2015, the number of VIP customers of “Artini” was approximately 138,000, representing an increase of 2.8% over the same period last year. The Group believed that loyal customers contributed a key portion of the Group’s revenue. By analyzing the shopping habits of our VIP customers and thereby understanding their preferences, the Group has consistently developed new series of products and strategically organised promotional activities to raise brand awareness among its existing and potential customers.

## CONCURRENT DESIGN MANUFACTURING (“CDM”) BUSINESS

After completion of disposal on the TCK Group, CDM sales have changed to the sales of the products at the customer’s chosen level of participation in the design process, concurrently works with the customers in designing the products and coordinating the manufacturers according to the customer desired final design. Hence, the customers have significantly changed.

Due to the change in the customer base and the keen competition on export of the fashion accessories during the Period, the turnover decreased from HK\$63,694,000 for six month ended 30 September 2014 to HK\$9,958,000 for six month ended 30 September 2015.

However, although the turnover of export business decreased significantly, the performance of the export business improved. During the period, the losses in CDM business decreased to approximately HK\$713,000 (for the six-month period ended 30 September 2014: approximately HK\$16,319,000). Such improvement is mainly attributable to the avoidance of the fixed costs in the factory as a result of the disposal of the subsidiaries.

# Management Discussion and Analysis

## FINANCIAL REVIEW

For the Period, the Group recorded a total turnover of approximately HK\$10,538,000, representing a decrease of 84.7% as compared with the same period in 2014. The decrease was mainly due to the restructuring the location of retailing points. During the Period, the turnover of the retailing and distribution and export businesses were approximately HK\$580,000 and approximately HK\$9,958,000 respectively, accounting for approximately 5.5% and approximately 94.5% of the total turnover of the Group. The Group's turnover was mainly derived from the PRC, Hong Kong and Europe, which accounted for 62.0%, 19.1% and 18.9%.

During the Period, gross profit decreased by approximately 90.1% to approximately HK\$738,000. Gross profit margin decreased to approximately 7.0% (for the six months ended 30 September 2014: approximately 10.8%). The cost of sales for the Period decreased by approximately 84.1% from approximately HK\$61,624,000 for the six months ended 30 September 2014 to approximately HK\$9,800,000 for the six months ended 30 September 2015. The decrease in cost of sales is mainly resulted from the decrease in the operation scale along with turnover. Further, due to disposal of the TCK Group, our CDM Sales have changed in terms of customer profile and sales. The transactions in new CDM Sales generally generate lower gross profit margin than those in manufacturing business.

Selling and distribution costs for the Period increased by approximately 270.4% to approximately HK\$30,143,000 as compared to approximately HK\$8,139,000 for the corresponding period in 2014. This increase in selling expenses is mainly resulted from continuous promotion of the retailing business in order to maintain our brand.

The Group did not incur any income tax for the six months ended 30 September 2015 (for the six months ended 30 September 2014: Nil).

## Liquidity and Financial Resources

As at 30 September 2015, the Group did not maintain any borrowings (As at 30 September 2014: approximately HK\$19,000,000 which was denominated in Hong Kong Dollars, secured by a pledge over a property with a carrying value of approximately HK\$6,870,000).

The Group continues to adopt a policy of dealing principally with customers with whom the Group has enjoyed a long cooperation relationship so as to minimise credit risk in its business.

## Dividend

The Board does not recommend the payment of any interim dividends for the Period.

## Foreign Exchange Exposure

The main business activities of the Group take place in the PRC and Hong Kong. Accordingly, the Board considers that the potential foreign exchange exposure of the Group is relatively limited. Moreover, the Group has not used any forward contracts or hedging products to hedge its interest rate or exchange rate risks during the Period. The management will, nonetheless, continue to monitor foreign currency risks and to learn more relevant information from financial institutions. During the Period, the Group recorded a net exchange loss of approximately HK\$3,463,000. The exchange losses are mainly resulted from depreciation of Renminbi during the Period.

## Significant Investments and Acquisitions

During the Period, the Group did not have any significant investments, material acquisitions or disposals of subsidiaries or associated companies. The Group continues to seek opportunities to acquire and cooperate with international customers in order to generate better returns for its shareholders. In addition, the Board will decide what the best available source of funding is for investments and acquisitions when suitable opportunities arise.

# Management Discussion and Analysis

## FINANCIAL REVIEW *(continued)*

### Contingent Liabilities

The Group did not have any significant contingent liabilities as at 30 September 2015 (31 March 2015: Nil).

### Human Resources

As at 30 September 2015, the Group had approximately 30 employees. During the Period, the total staff cost including directors' emoluments amounted to approximately HK\$3,130,000. To enhance the expertise, product knowledge, marketing skills and overall operational management skills of its employees, the Group organised regular training and development courses for its employees, and provided them with a competitive remuneration package, including salary, allowance, insurance, commission and bonus. Meanwhile, in order to create a harmonious and family-like working atmosphere, the Group emphasizes on listening to employees and continually developing paths for staff promotion.

### Investor Relations

The Group strongly believes that investor relations are important to a listed company. Maintaining relationships with investors and keeping them abreast of the latest corporate information and business development in a timely manner would enhance the transparency and corporate governance of the Group, thus strengthening its corporate position. Our investor relationship representatives will more actively participate in various investor-related activities.

## PROSPECTS

In 2015, in the face of the slowdown of China's economic growth and the weak consumption demand, the retailing market remained in the wintry stage. Retailing brands have entered into a challenging period during which only the fittest survive. Under such difficult macro-environment, it was a mounting challenge for the management of the Company. In the reporting period, the Group was in search of a suitable development path through constantly integrating our resources, minimizing costs and enhancing efficiency.

In the future, the Group will promote the transformation of the "Internet Plus" model, expand the online marketing channels through e-commerce platforms and promote internet-based shops to facilitate a deep integration of online and offline business. With only two remaining retail points, though, "ARTINI" owns huge loyal customer resources, and therefore the management of the Company still holds confidence in the "ARTINI" brand. To maintain the brand awareness, the Company will continue to engage in media promotion and expects to further decline rentals of shopping malls. Once the rentals become reasonable, the Company will consider to open new shops in suitable positions.

In respect of business, smart wearable devices became a new hotspot of e-consumption in 2015. The smart wearable device market is expected to reach RMB11.27 billion and to enter into a rapid growth period in the next two years. China will become a consumption power of smart wearable devices, and therefore the management of the Company believe that there will be much room for development for female smart wearable products. In the future, the Company plans to promote fashionable and smart female health products with the combination of intellectual technology and traditional jewelry.

In addition, the Group will seek potential projects in the future to realize the scale expansion and resources integration of the Company and promote a rapid transformation and upgrade of the Company which may have a positive impact on its future development.

# Corporate Governance and Other Information

## CORPORATE GOVERNANCE

### Corporate Governance Practice

The Company has adopted the Corporate Governance Code (the “CG Code”) as set out in Appendix 14 of the Rules Governing the Listing of Securities (the “Listing Rules”) on The Stock Exchange of Hong Kong Limited (the “Stock Exchange”). The Company has complied with the code provisions in the CG Code for the Period, except for the following deviation:

Code provision A.2.1 of the CG Code provides that the roles of chairman and chief executive should be separate and should not be performed by the same individual. From 21 June 2013 onwards, the roles of chairman and chief executive of the Company were performed by Mr. Tse Hoi Chau.

The Board considers that vesting the roles of chairman of the Board and chief executive of the Company in the same individual is beneficial to the business prospects and management of the Company. The Board will review the need of appointing suitable candidate to assume the role of chief executive if and when necessary.

### Model Code for Directors’ Securities Transactions

The Company has adopted the Model Code for Securities Transactions by Directors of Listed Issuers (the “Model Code”) as set out in Appendix 10 of the Listing Rules as its code of conduct for securities transactions by the Directors.
